SUMMARY

Innovative **Frontend Developer** with **2 years** of expertise in building user-centric, high-performance web applications using **React Js**. I transform ideas into sleek, scalable solutions, delivering real value to businesses and their users. Driven by results and innovation, I'm the candidate who ensures your digital goals don't just meet expectations—they exceed them.

SKILLS

Programming Languages: JavaScript, HTML5, CSS3

Frameworks & Libraries: React.js, React Hooks, React Router, Ionic Framework, Tailwind CSS, Bulma CSS, GSAP, Shadcn UI, Axios

Web Development: RESTful APIs Integration, Responsive Web Design, Single Page Applications (SPA)

Deployment & Hosting: Vercel, Netlify, GitHub Pages

Version Control: Git, GitHub

Tools: Visual Studio Code (VS Code), Postman, Jira

Platforms: Linux, Windows, macOS

PROFESSIONAL EXPERIENCE

Frontend Developer (React js)

January 2024 - Present

Monk Industries

Indore, India

- Developed responsive web applications using React.js, combining functionality and **visually appealing UI** design for both internal initiatives and client projects.
- Collaborated directly with clients to transform their requirements into effective, user-centered solutions.
- Mentored interns**, providing guidance and fostering growth while improving overall project efficiency and outcomes.
- Designed and implemented an internal dashboard to visualize customer data, resulting in a 20% reduction in time and effort for data analysis tasks.

Software Engineer

December 2022 - January 2024

Capgemini

Mumbai, India

- Developed and maintained **scalable React.js web applications** for **large enterprise clients**, delivering efficient solutions aligned with business goals.
- Worked closely with **cross-functional teams** (designers, backend, QA) to deliver **responsive and user-friendly** web applications with seamless UI/UX.
- Integrated **third-party APIs and services** into React apps, enabling dynamic content updates and real-time data interaction for clients across industries.
- Built **reusable React components and libraries**, improving development speed, consistency, and reducing long-term technical debt.
- Contributed to **Agile sprints**, participating in planning, stand-ups, and reviews via **Jira**, ensuring timely delivery, exceeding client expectations, and optimizing performance for faster load times.

PROJECTS

FlavorFind: Interactive Recipe Finder Web App [Link](#)

- FlavorFind is a dynamic recipe search app designed with React js and Tailwind CSS, featuring **seamless API integration** using **Axios**. It highlights expertise in creating responsive, user-focused web solutions and showcases proficiency in third-party RESTful API interactions.

AI Startup Landing Page [Link](#)

- It is a cutting-edge landing page crafted with React and Tailwind CSS, featuring smooth, interactive animations powered by GSAP and Lenis. It demonstrates advanced UI development skills, delivering a seamless and visually engaging user experience.

EDUCATION

Bachelor of Technology in Computer Science (BTech in CS)

Shivajirao Kadam Institute of Technology and management

Indore, Madhya Pradesh, India

August 2018 - June 2022
