SUMMARY

Frontend Developer with experience building responsive, high-performance React.js applications, optimizing UI workflows, and delivering clean, scalable interfaces. Skilled in React Hook Form, Zod, and performance optimization, with strong collaboration across backend, QA, and design teams. Experienced in presenting UI decisions to stakeholders and contributing to fast, user-focused feature delivery.

EXPERIENCE

Freelance - Web Developer & Designer

*Monk Industries
Indore, India*

Feb 2024 - present

- Built responsive **Web pages and UI components** while collaborating with marketing and design teams to ensure visually consistent, high-quality user experiences.
- Designed **campaign-ready graphics and digital assets** for social media, developing creative concepts aligned with brand guidelines.
- Presented UI/UX improvements, design rationales, and website performance insights directly to the founders to support product decisions.
- Mentored interns in modern web development and graphic design practices, and implemented **automation workflows** to improve design-to-publish efficiency.

Software Engineer

*Capgemini
Mumbai, India*

Dec 2022 - Jan 2024

- Built and maintained responsive React.js modules for a crew payment portal, streamlining request and approval workflows and improving efficiency by **35%**.
- Implemented **React Hook Form** with **Zod** for schema-based validation, reducing form submission errors by **40%** and enhancing overall UX.
- Integrated REST APIs using Axios with JWT authentication and leveraged **React Query** for server-state caching, improving data load performance by **30%**.
- Collaborated closely with QA and backend teams in an Agile setup, resolving over **90%** of UI and logic bugs before UAT through proactive testing and debugging.
- Optimized large data grids using virtualization and route-based code-splitting, reducing initial page load time from 6s to **3.8s** in production.

EDUCATION

B.Tech in Computer Science

Shivajirao Kadam Institute of Technology and management

July 2018 - May 2022

Indore, India

SKILLS

Frontend Technologies: React.js, Next.js, JavaScript (ES6+), Typescript, TanStack Query, Zod, React Hook Form, HTML5, CSS3, Tailwind CSS, Jest, React Testing Library

Tools & Workflow: Git, GitHub, VS Code, Jira, Agile/Scrum, Postman, Netlify/Vercel, Amazon Web Services (AWS)

APIs & Backend Basics: REST APIs, Axios, JWT Authentication, PostgreSQL, Node.js (Basics)

Design & Optimization: Figma, UI/UX Principles, Performance Optimization.

PROJECTS

FlavorFind – Recipe Search App [Link](#) | [Github](#)

- Built using React.js and Axios with a responsive UI.
- Integrated a third-party recipe API to enable real-time search functionality.

AI Startup Landing Page [Link](#) | [Github](#)

- Developed with React.js and GSAP for scroll-based animations.
- Designed a sleek, modern UI with responsive layout and motion effects.
